95%...Really!

Shocking but, did you know 95% of what we do is considered non-value added by our customers! Non-value added activity or waste is defined as any human activity that absorbs resources, but creates no real value.

After mapping a permit process, here you can see our "Process Time" or touch time is 7.6 days but our "Lead Time" or throughput time is 85 days. That means it takes only 7.6 days to complete the work but, 85 days for it to flow through the process. A whopping 91% non-value added

Our True North...

Protecting jobs in America by helping companies stay competitive

activity or waste that can potentially be eliminated from the process resulting in high quality, high value and shortest lead-time product or service!

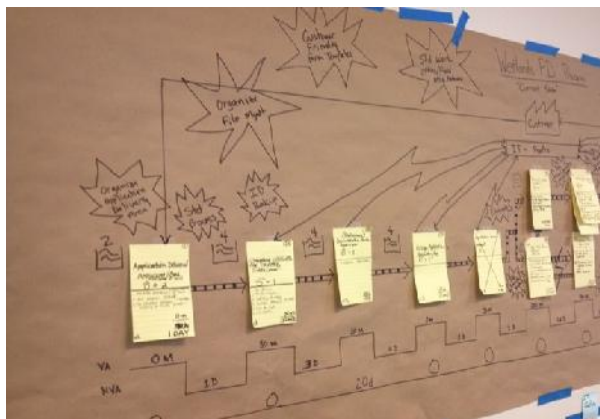

Seem hard to believe? Our work with process mapping confirms non-value added time from 88% to 97% exists in all business processes.

Process Evolution

A process is a series of tasks performed to achieve planned results. In business, every process has a starting point and an ending point and affects the company's stakeholders and clients either directly or indirectly. Most current business processes are the products of work methods designed, added on to, tweaked, and reconfigured over numerous years and not specifically designed for efficiency!

Using proven business process and value stream mapping tools we can help your organization 'see' the waste that exists in your process and identify ways to remove it.

What is a process map you ask? It is a pictorial representation of an entire process and workflow, detailing actual steps taken, and highlighting all applicable interfaces, decision points, and information sources. It is constructed with high employee involvement and is purposely low tech, high touch!

Remember...if the work flow is invisible to you, chances are the savings are as well!

About Us

Our consultants are experts in Lean, Lean Sigma, Lean Human Resources and Lean Technology Solutions. With our experienced team, we have the knowledge and experience to deliver a total Lean Transformation to your organization! We have proven success in implementing Lean in a broad range of companies and industries and are confident we can help your organization become more efficient. Contact us today to see how we can help!
